

Where lifelong friendships are born.

Our environment of compassion, camaraderie, and kindness helps sow the seeds of lifelong friendships. In fact, when graduates return to the school, many speak with great fondness of St. John School's close-knit community—and the relationships they forged with teachers and students that endure to this day.

From a foundation of values and knowledge, K3-4 learners soar.

By blending compassion with curiosity, St. John School sets the stage for dynamic discovery. Students learn the value of doing the right thing, as they build math skills using iPads, study Italian and Italian culture, and explore extra-curricular passions, including music, Math Olympiads, Minecraft, dance, drama, Chinese, and more.

Catholic roots.

A small, inspired community of

learning,
compassion,
creativity and
innovation.

K3 through Grade 4

Enrich your child with an education that is grounded in tradition—and open to possibility.

Nestled in the heart of Boston's North End, St. John School has groomed kindergarten and grade school students for bright futures since 1895. In an environment that champions Catholic values, our kind, compassionate students break free from the distractions and social pressures of larger schools. Our dedicated teachers and small class size ensure that each student's unique progress is celebrated—and that their imagination and potential is constantly nurtured.

Encouraging STEM from the start.

While a deep sense of tradition fills our community, our learning environment is focused on preparing students for innovative futures. Our classrooms are wired with high-tech features and our i2 STEM programs focus on inquiry-based science, designed to help students explore and learn on the cutting-edge.

Our STEM-centric learning environment includes:

- A science and technology lab
- SplashMath, an engaging way to review and reinforce math concepts previously taught
- DigitWhiz, an online math practice program, targeted to each student's learning level
- Tech-savvy educators
- One iPad for every student and teacher
- Smart boards in every classroom
- A secure wireless network

Structure, rigor, with plenty of room to fly.

Children have an amazing capacity to learn, even at a very young age. To this end, our staff employs a wide breadth of proven approaches that help build literacy in students as early as the K3 level:

- The Owl Curriculum (for K3 and K4), a research-based early literacy curriculum
- Super Kids Reading Program
- Collins Writing Program, designed to build reading and writing skills simultaneously
- Latin Greek Roots Program

As we help young students explore and master new subjects, we also open their lens to the world outside. We expose children to the vibrant culture of the city just beyond our walls, through frequent field trips to museums, theaters, and innovative companies.

Through on-going professional development, our dedicated teaching staff keeps pace with the latest advancements in education and learning.
